

Dedicated to Your Success

The integration between Exterro Fusion and Digital Reef E-Discovery automates the transfer from Exterro of custodian and data steward information, as well as case and matter management details necessary to defensibly preserve and collect data in Digital Reef. The integrated solution updates legal teams using Exterro Fusion's real-time reporting to track the e-discovery process, and documenting preservation and processing steps. The solution continues to monitor for changes to legal matters, such as new legal hold notices or revisions to e-discovery task requests managed by Exterro. The integration of legal and data processes improves efficiencies and cuts costs.

Exterro Fusion Core Platform

Exterro's Fusion is an end-to-end legal governance, risk and compliance management solution suite. Architected around a single, centralized workflow platform, Fusion streamlines legal processes by facilitating collaboration and visibility across disparate entities: in-house legal teams, outside counsel, different business units, and service providers. Fusion integrates processes and data from many third-party systems, including HR, asset and matter management tools, and EDRM review tools such as Digital Reef. Fusion orchestrates essential services to ensure faster, smarter litigation preparation, response to e-discovery and compliance requests and simplifies legal processes.

Digital Reef eDiscovery

The most scalable software for eDiscovery information management, legal hold preservation, processing, early case assessment, review and production. Digital Reef can process and review massive quantities of electronically stored information (ESI,) identify and classify sensitive data to optimize data loss prevention (DLP), identify information assets under regulatory scrutiny, migrate data into records management platforms, and migrate or delete duplicate and unnecessary data.

Fully Defensible Process

Using Exterro Fusion and Digital Reef, attorneys can use Fusion to specify data map, legal hold, records retention/destruction suspension or reengagement requests, collection criteria or e-discovery work orders; Digital Reef searches data, executes holds, collections and culling, and pushes reports back to Fusion for a comprehensive chain-of-custody log, ensuring a thorough and defensible e-discovery process.

Benefits to Legal

- Eliminates miscommunication and reduces risk of error, spoliation, and under- or overcollection when translating matters from legal to IT.
- The joint solution automates e-discovery processes to incorporate industry best practices and corporate policies, ensuring repeatable and defensible processes across the EDRM. Gain access to all information legal team members needed to manage discovery.
- Collaboration capabilities built into the Fusion platform enable legal teams to work closely with outside counsel, IT teams and records management in defining and executing collection requirements.
- Fusion's integration with Digital Reef allows the legal team to manage e-discovery from a single, user-friendly platform.
- Aligns business processes and data management.
- Save time in e-discovery projects with faster, streamlined processing, review, and data classification.
- Through the integration of Fusion and Digital Reef, all systems, activities, and processes are audited, making it more defensible than a manual process.

Complete end-to-end e-Discovery suite

Addresses Critical Phases of EDRM

Benefits to IT

- Records retention and destruction policies – and corresponding data preservation, collection, and disposition processes – are automatically suspended or re-engaged as necessary.
- Fusion specifies data map, legal hold or collection criteria; Digital Reef searches and crawls data sources to find and collect the ESI, then publishes back to Fusion, ensuring a thorough and defensible e-discovery process.
- Rapid implementation and scalable architecture.
- Secure Web services APIs ensure easy integrations with current IT infrastructure and customer choice in deployment scenarios.
- Quickly execute work orders provided by the legal team; improved resource allocation and delegation.

Digital Reef and Exterro

Joint Solution Benefits:

Today's legal discovery process has evolved to become increasingly complex and costly. Companies are now faced with an escalating amount of ESI. Legal matters have grown in frequency, and often involve multiple law firms, custodians and experts in disparate geographies. The Digital Reef and Exterro unified offering allows companies to significantly reduce legal risk and litigation costs associated with e-discovery, and delivers immediate control over the information legal teams choose to preserve and collect.
