

## 1 + 1 = 3

The integration between Exterro's Fusion and StoredIQ's Intelligent Information Management Platform (IIM) streamlines e-discovery management and execution. The joint solution combines comprehensive e-discovery process management, legal holds, vendor, resource and information management with automated search, preservation and collection tools. Together, they deliver greater visibility and control over your ESI.

### Exterro Fusion Core Platform

Exterro's Fusion is an end-to-end legal governance, risk and compliance management solution suite. Architected around a single, centralized workflow platform, Fusion streamlines legal processes by facilitating collaboration and visibility across disparate entities: in-house legal teams, outside counsel, different business units, and service providers. Fusion integrates processes and data from many third-party systems, including HR, asset and matter management tools, and EDRM review tools. Fusion orchestrates essential services in ensuring faster, smarter litigation preparation, response to e-discovery and regulatory compliance requests and simplifying legal processes through automated workflow management.

### StoredIQ Intelligent Information Management Platform

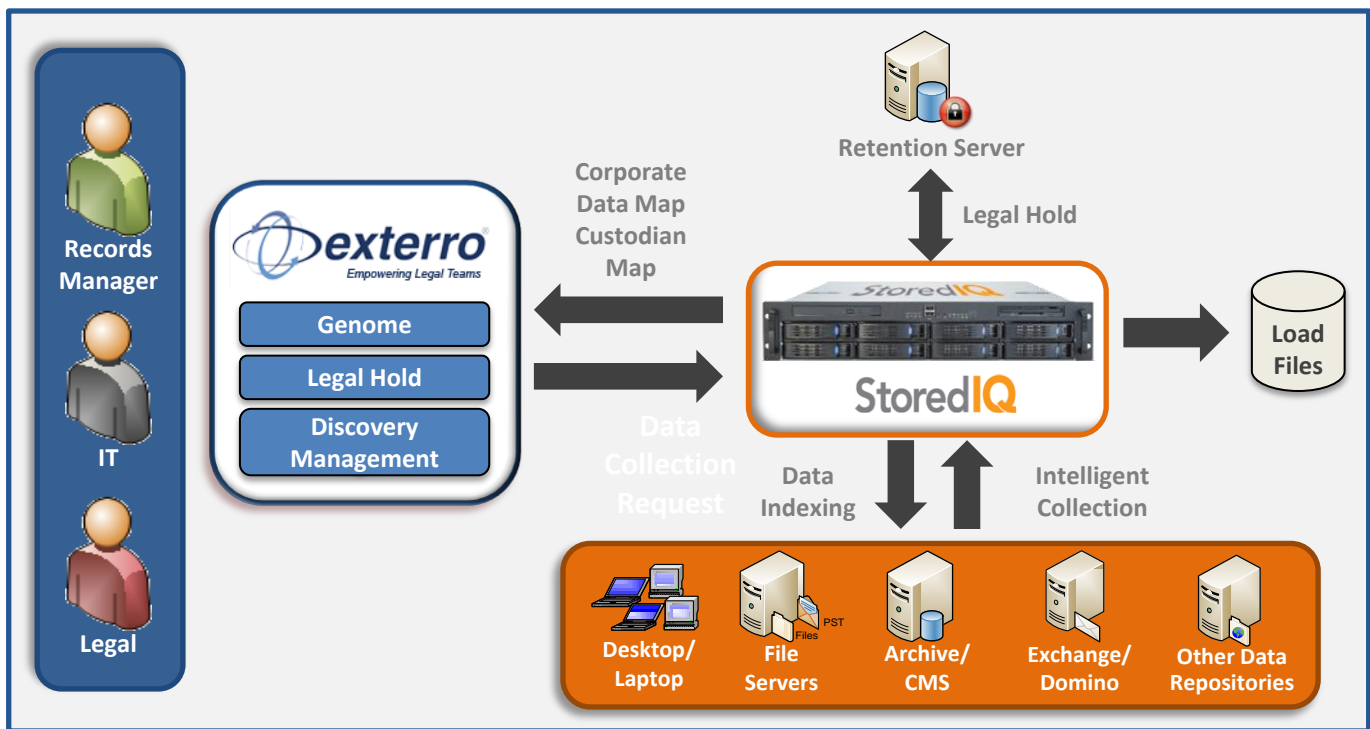

The StoredIQ Intelligent Information Management Platform is an enterprise-class, software-based appliance designed to provide an in-depth assessment of unstructured data across the enterprise. StoredIQ gives organizations critical visibility into and control over their business content to make more informed decisions about the management, retention, and disposition of their data. StoredIQ discovers, assesses, and manages unstructured data across the industry's broadest range of data sources, including: storage, email, archiving, content, document, and record management systems.

### Dedicated to your success

Using the Exterro Fusion EDRM connector to StoredIQ, attorneys can scope matters and execute holds and collection plans within Fusion and have these instructions immediately generate corresponding cases within StoredIQ, including all appropriate custodian lists, data sources, and scoping criteria. Progress indicators from Stored IQ keep the issuing legal team apprised of the collection and culling process.

### Benefits to Legal

- Eliminates miscommunication and reduces risk of error when translating matters from legal to IT.
- Exterro automates eDiscovery processes to incorporate industry best practices and corporate policies, ensuring repeatable and defensible processes across the EDRM. It brings back all the information from all applications legal team members need to manage discovery.
- Collaboration capabilities built into the Fusion platform enable legal teams to work closely with outside counsel, IT teams and records management in defining and executing collection requirements.
- Fusion's integration to StoredIQ allows the legal team to manage e-discovery from a single, user-friendly platform.
- Assures the legal team that records policies are suspended and re-engaged appropriately for data affected by legal holds.
- StoredIQ's legal hold capabilities include preservation of all content and metadata, full audit trails, single instance storage, and comprehensive reporting within Exterro.
- Throughout the integration of Fusion and StoredIQ, all systems, activities, and processes are audited making it more defensible than a manual process.

## Benefits to IT

- StoredIQ enables thorough collection of unstructured data including data on file servers, email, SharePoint and other corporate systems.
- StoredIQ's performance and ability to scale can quickly classify, cull and de-duplicate data prior to review, reducing costs and increasing efficiency.
- StoredIQ creates production upload files for all major review platforms as well as EDRM XML that can be uploaded into your review or early case assessment application saving time and
- Send StoredIQ legal hold requirements directly from Fusion and quickly identify and collect money.
- Exterro's Fusion platform ties process and people to the data managed and collected by StoredIQ and create clear, precise work orders for IT team members.

## StoredIQ and Exterro

### Joint Solution Benefits:

Today's legal discovery process has evolved to become increasingly complex and costly. Companies are now faced with an escalating amount of electronically stored information (ESI). Legal matters have grown in frequency, and often involve multiple law firms, custodians and experts in disparate geographies. This unified offering allows companies to significantly reduce legal risk and litigation costs associated with e-discovery, and delivers immediate control over the information legal teams choose to preserve and collect.
