

Exterro Fusion™ Genome™ Data Mapping

Accelerate response, reduce work, and standardize processes

Fusion Genome™ dynamic data mapping provides enterprises, legal teams and consultants with a comprehensive inventory of an organization's IT systems and employees data assets.

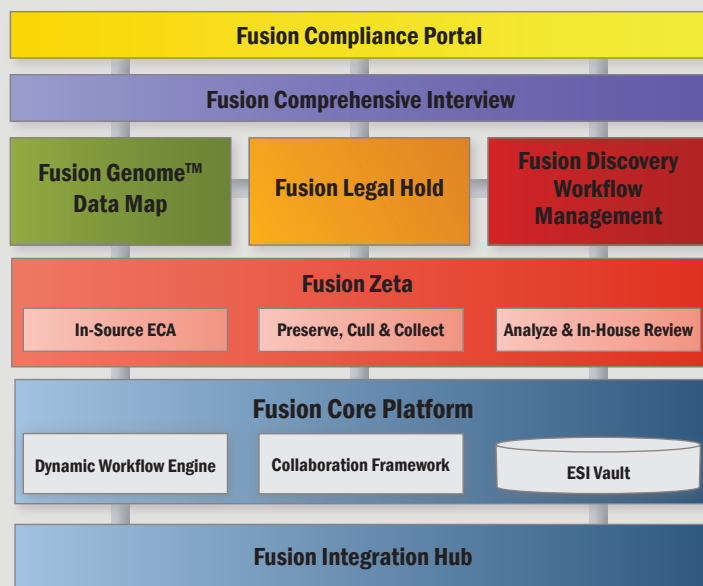

Genome's process automation helps an organization build and maintain an evergreen data map, mirroring a company's information base as it evolves. Its rich visualization and cross-functional collaboration capabilities provide a structured inventory for identifying, collecting and producing relevant ESI, and provide an advantage in meet-and-confer preparations. Fusion Genome™ delivers faster, smarter litigation response to e-discovery and regulatory compliance requests.

Genome™ integrates with third-party software tools, including HR and asset management systems, as well as other Fusion solutions, for rich and complete data capture. The Exterro Fusion suite offers IT infrastructure and EDRM tool integrations, dynamic data mapping, litigation holds and a custodian compliance portal. Since Fusion Genome™ dynamic data mapping is built on the Exterro Fusion Platform, users get visibility into and control over their data sources and information, including real-time insight into data mapping project progress, cost and deadlines.

The Exterro Fusion™ software suite offers IT infrastructure and EDRM tool integrations, litigation holds, a discovery workflow management solution, robust interview module, and a custodian compliance portal.

“ Keeping track of what systems you have and who are they key players associated with those systems is an increasing challenge. Whether it is for business continuity, litigation support, legal hold, information security or data loss prevention, a data map gives you that bit of knowledge that helps you stay on top of an ever-changing landscape.”

– Bruce Phillips,
Vice President of Information Security
Fidelity National Financial

Exterro Fusion™

Built to reflect how legal and IT teams think

Exterro Fusion is an integrated solution suite backed by the full power of the Exterro Fusion workflow and data management platform. Its collaboration framework, dynamic workflow engine, secure ESI vault and audit trails enable efficient execution of end-to-end e-discovery projects. The Fusion Integration Hub allows all Fusion solutions to integrate with the IT infrastructure already in use, like HR or asset management systems, as well as other EDRM tools. With Exterro Fusion, legal and IT teams get the benefit of the legal industry's most trusted platform and its 360-degree visibility into and control over all litigation tasks and projects.

Systems Added And Updated

To learn how Exterro can deliver value to your organization, contact an e-discovery expert at info@exterro.com or call 877-EXTERRO.

Features and Benefits

Process Automation: Fusion Genome's process automation provides a standardized process which facilitates building and ensures an evergreen data map

- **Template Management:** Customize or create templates that reduce work, minimize errors, and standardize the information collected about electronically stored information.
- **Interview Management:** Design and assemble interviews through an automated, repeatable and structured method to identify key custodians and relevant ESI.
- **Custodian Management:** Access all custodian and data steward information from a centralized location.
- **Data Source Information Management:** Keep usage and relationship history between data sources and custodians up to date and evergreen; enables quick deployment of legal holds.
- **Data Map Refresh:** Keep data map evergreen by certifying systems are up to date; includes policies and procedures, governance, and usage.

Visualization: Fusion Genome's rich visualization and intuitive navigation provide real-time, top-down/bottom-up views of business units, systems and matters

- **Walk-and-see data map:** View powerful, multidimensional representation of organizational structure; view through litigation profiles, business unit, record types and other configurable criteria.
- **Intelligent data sculpting:** Create and view customized data lists in real time, through executive management console. Filter data sources by litigation risk to address 26(f) conference negotiation and 30(b2) deposition preparations.
- **Navigation dashboard:** Navigate through an intuitive, user-friendly visual overview of the data map, workflow and subcomponents designed to mirror the way users think.
- **Data map dashboard:** View all changes, trends and relationships between systems by compliance regulation or system status through powerful, birds'-eye-view reporting function.

Collaboration: Exterro Fusion™ Genome's user-centric IT Portal provides a shared, structured inventory to legal, IT and RIM teams, or other business units tasked with identifying and cost-effectively collecting and producing relevant ESI

- **IT Portal:** See and communicate what systems IT and business managers own, how employees interact, acknowledge legal holds, edit systems and comply with interview requests through a personalized portal. Enables consistent communication of compliance needs across the enterprise and keeps IT, compliance officers and records managers alerted to potential compliance violations. Provides insight into where potential risks exist.
- **Legal Hold Indicator:** Highlight all active legal holds in the system, ensuring compliance with FRCP rules and automatically preventing spoliation.

For Legal

- Comprehensive view into IT infrastructure with legal uses in mind
- Accurate identification of correct resources for collection projects
- Real-time custodian and data steward information
- 26(f) preparation

For IT

- Decreases turnaround time for e-discovery responses
- Streamlines collection workflow
- Eliminates manual work
- Frees resources to focus on core competencies
- Ensures accurate IT inventory

For Executives

- Automates business process improvement
- Reduces time and cost of data map builds and refreshes
- Provides support for cost-shifting arguments in court
- Critical component of IT infrastructure
- Reduces risk exposure
